

# Co-Financed Unsolicited bid COAR CENTRO

PROINVERSIÓN promotes high-performance schools (COAR, for its acronym in Spanish) in the regions of Pasco, Huancavelica, and Cusco through Public-Private Partnerships (PPP). This PPP includes the design, financing, and construction of three COAR, as well as the infrastructure maintenance and the provision of services required for their appropriate operation during the concession term. The purpose is to provide high-performance Peruvian students with educational infrastructure and complementary services with high-quality standards so that they have access to a comprehensive educational service. It is important to emphasize that the State will be in charge of the educational and administrative management, as well as of the pedagogical services.
